AIR RUNNER ARUN100

THE ULTIMATE TRAINING TOOL

Incorporate a new dimension into your training with the Curved Treadmill Air Runner ARUN100. The completely self-powered, manual ARUN100 offers a one-of-a-kind workout experience that requires zero electricity. Feel the freedom of this totally manual treadmill while running or walking on the unique curved running surface where you are the motor.

The Air Runner ARUN100 challenges the entire body while burning up to 30% more calories than any other treadmill.

High intensity intervals are made easy when there are no buttons to reach for to increase or decrease speed; this also makes for quick transitions during group training.

The non-motorized ARUN is made possible by the running surface. The Slat Belt system is near frictionless, which allows the belt to glide smoothly. Combine that with an innovative curved running surface and suddenly users are able to control their pace at will. To speed up, simply start running, to slow down, allow yourself to drift down the curve. It is all about body position and gravity.

No need to push a button and wait for the treadmill to speed up. As a user takes longer strides up the curved belt, the speed increases, and as the user simply drifts back towards the rear, the speed decreases.

**NO MOTOR
CURVED DECK
UNLIMITED SPEED**

SPECIFICATIONS

Self powered with 8 levels of resistance

Robust steel frame with lateral and central handles to aid balance and support

Curved rubber running belt

Noise degree below 80dBA

Protection Level IP 20

Battery operated LCD monitor displaying Time; Distance, Calories and Pulse

Wireless Heart Rate Monitor with chest belt included

Product dimensions: L 201 x W 89 x H 142 cm

Product weight: 190 kg

Max. user weight: 180 kg

Console
Battery operated LCD monitor

Control Knob
8 levels of resistance
